

Legal & General
Global Technology Index Trust
**Interim Manager's
Short Report
for the period ended
10 February 2018**

**EVERY
DAY
MATTERS.®**

Investment Objective and Policy

The investment objective of this Trust is to secure capital growth from a portfolio of securities of companies engaged in Information Technology.

Securities representing all such companies in the FTSE World Index will normally be held with weightings generally proportionate to their market capitalisation.

From time to time, non-Index constituents may be held as a result of a corporate action and these holdings will be sold or transferred as soon as reasonably practical.

Risk Profile

Market Risk

Market risk arises mainly from uncertainty about future prices. It represents the potential loss the Trust may suffer through holding market positions in the face of market movements. The Manager adheres to the investment guidelines and in this way, monitors and controls the exposure to risk from any type of security, sector or issuer.

Currency Risk

This Trust is invested in overseas financial securities. The performance of the Trust may therefore be affected by changes in exchange rates. This risk may be managed by the use of forward currency contracts, which aim to manage the effect of changing exchange rates.

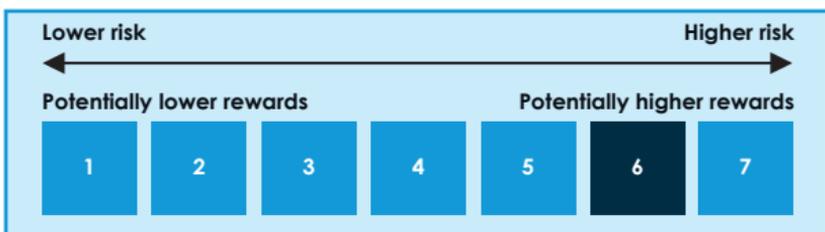

Trust Facts

Period End Date for Distribution:		10 Aug
Distribution Date:		10 Oct
Ongoing Charges Figures:	10 Feb 18	10 Aug 17
R-Class	0.95%	1.13%
F-Class	0.46%	0.46%
I-Class	0.32%	0.32%

The Ongoing Charges Figure (OCF) is the ratio of the Trust's total discloseable costs (excluding overdraft interest) to the average net assets of the Trust.

The OCF is intended to provide a reliable figure which gives the most accurate measure of what it costs to invest in a trust and is calculated based on the last period's figures.

Risk and Reward Profile

- This risk and reward profile is based on historical data which may not be a reliable indication of the Trust's risk and reward category in the future.
- The category number highlighted above reflects the rate at which the Trust's unit price has moved up and down in the past. If the Trust has less than five years' track record, the number also reflects the rate at which the Index the Trust tracks has moved up and down in the past. Higher numbers mean the potential reward could be greater, but this comes with increased risk of losing money.
- The Trust is in category six because it invests in company shares which are sensitive to variations in the stock market. The value of company shares can change substantially over short periods of time. Company shares are generally considered to be higher risk investments than bonds or cash.
- The Trust's category is not guaranteed to remain the same and may change over time.
- Even a trust in the lowest category is not a risk free investment.

Distribution Information

The policy is to distribute, on an annual basis, all available revenue, after deduction of those expenses which are chargeable in calculating the distribution. This being the case, there is no interim distribution.

Net Asset Values and Units in Issue

Class	Net Asset Value (£)	Units in Issue	Net Asset Value per Unit (p)
R-Class Accumulation Units	63,459,111	162,948,661	38.94
F-Class Accumulation Units	438,130	1,084,185	40.41
I-Class Accumulation Units	143,032,508	335,665,508	42.61

Past performance is not a guide to future performance.

The price of units and any income from them may go down as well as up.

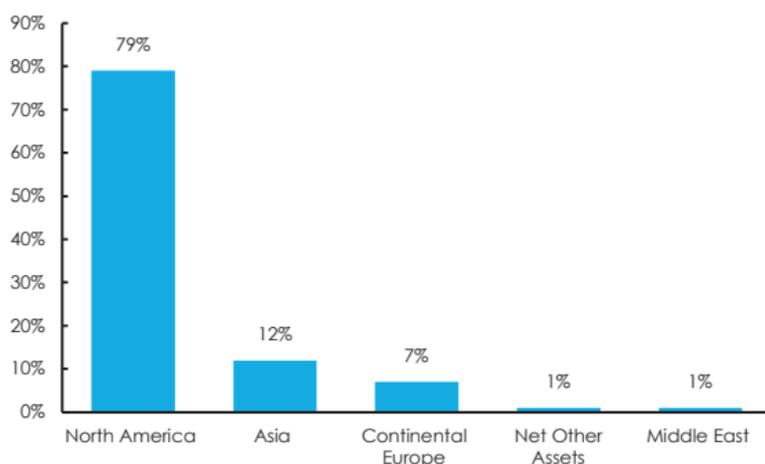

Exchange rate changes may cause the value of any overseas investments to rise or fall.

Portfolio Information

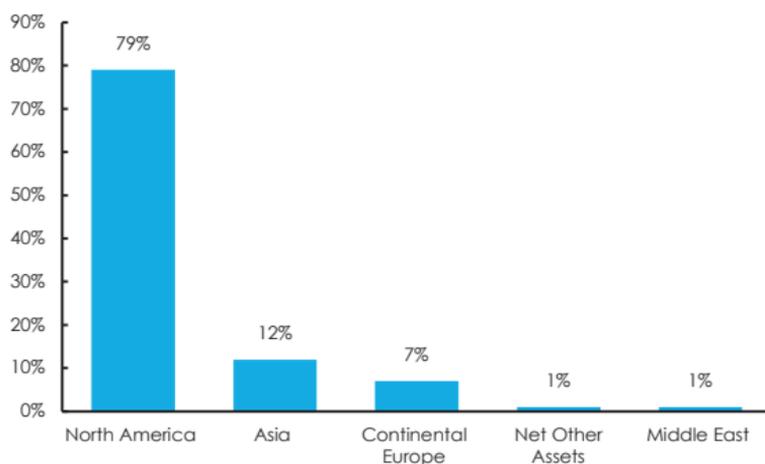

The top 10 holdings and their associated weighting at the current period end and preceding year end were:

Top 10 Holdings at 10 February 2018		Top 10 Holdings at 10 August 2017	
Holding	Percentage of Net Asset Value	Holding	Percentage of Net Asset Value
Apple	14.25%	Apple	16.23%
Microsoft	11.51%	Microsoft	10.64%
Alphabet 'C'	5.44%	Alphabet 'A'	5.44%
Alphabet 'A'	5.39%	Alphabet 'C'	5.43%
Facebook 'A'	4.69%	Facebook 'A'	4.68%
Intel	3.71%	Intel	3.50%
Cisco Systems	3.47%	Taiwan Semiconductor Manufacturing	3.27%
Taiwan Semiconductor Manufacturing	3.32%	Cisco Systems	3.20%
Oracle	2.50%	Oracle	2.95%
Nvidia	2.41%	IBM	2.60%

Trust Holdings as at 10 February 2018

Trust Holdings as at 10 August 2017

Manager's Investment Report

During the period under review, the bid price of the Trust's R-Class accumulation units rose by 4.51%. FTSE, the Index compiler, calculates the benchmark Index at the end of the business day using closing prices, whereas the Trust is valued using prevailing prices at 3pm. Therefore, for tracking purposes, the Trust has been revalued using closing prices and foreign exchange rates. On this basis, over the review period, the Trust rose by 5.91%, on a capital only basis, compared to the Sterling capital return of the FTSE World Technology Index of 5.62% (Source: Bloomberg), producing a tracking difference of 0.29%.

Past performance is not a guide to future performance.

The value of investments and any income from them may go down as well as up.

Exchange rate changes may cause the value of any overseas investments to rise or fall.

Market/Economic Review

Equity markets have made further gains over the last six months, reflecting a steady improvement in global economic indicators and earnings growth that has exceeded expectations. Investors have favoured technology stocks in anticipation of an upturn in the semiconductor industry, while earnings announcements from the major technology companies, particularly in the US, have also been encouraging. Mining stocks have also performed well as commodity markets rallied, while energy stocks outperformed as a result of the oil price ending 2017 at an 18-month high. In contrast, utilities and telecoms, both sectors more sensitive to bond markets, have underperformed.

US equities ended the year at an all-time high, boosted by an acceleration in the domestic economy and congressional approval for the Trump administration's tax reforms, which included a substantial cut in corporation tax. The UK equity market ended 2017 on a positive note, posting its best monthly return of the year in December as Brexit negotiations with the European Union progressed to trade matters and underpinned investor confidence. Japanese and smaller Asian markets were strongest in Sterling terms. In Japan, investors reacted favourably to a resounding victory for incumbent prime minister Shinzo Abe in the general election, which was viewed as heralding further economic reforms. Asian equity markets performed well as the strong global backdrop has boosted the region's export-driven economies. In Europe, although corporate results have highlighted improving earnings momentum and indicators suggest regional economic activity is accelerating, markets trailed the FTSE World Index as political concerns resurfaced.

Manager's Investment Report continued

More broadly, emerging markets have outperformed developed markets, supported by the strong global backdrop and underlying corporate earnings growth.

Trust Review

Companies held within the Trust are held with weightings generally proportionate to those of the benchmark index. Therefore, investment activity, other than to raise or invest cash, is only necessary when there are changes to the benchmark index, or as a result of a corporate action.

At the end of the reporting period, there were 92 companies in the FTSE World Index classified as Technology Hardware & Equipment and a further 77 companies classified as Software & Computer Services. These sectors accounted for approximately 49% and 51% of the Trust's benchmark index respectively, by market value.

The 10 largest constituents, the largest quoted technology companies in the world, were Apple, Microsoft, Facebook, Alphabet, Intel, Cisco Systems, Taiwan Semiconductor Manufacturing, Oracle, Nvidia and IBM. Of these companies, which together account for 61% of the value of the Index, only Taiwan Semiconductor Manufacturing (Taiwan) is based outside the US.

The three largest countries by market value in the Index were the US (82.7%), Taiwan (4.8%) and Japan (3.6%).

During the reporting period there were two Index reviews carried out by FTSE. The September 2017 quarterly Index review resulted in seven additions and no deletions. The largest additions were Gartner, CDW and Arista Networks, all in the US. Of the 17 changes to the free share capital of constituents the largest was a decrease in weight for ASML in the Netherlands.

The December 2017 Index review resulted in no additions and no deletions. There were however, 33 changes to the free share capital of constituents, with the largest increase being Oracle (US) and the largest decreases being Apple, Micron Technology and IBM (all US).

Outside of the review Mobileye N.V. (US) was acquired by Intel (US) in a \$14 billion cash deal and deleted from the Index.

Outlook

Equity markets began 2018 on a positive note. Europe outperformed other developed markets as the Eurozone economy expanded at its fastest pace for a decade in 2017, marking 19 consecutive quarters of expansion. Southern European markets such as Italy, Spain and Greece, were the strongest in January. Italy benefited from an improving political outlook as Berlusconi's centre-right alliance gained momentum ahead of elections due in March. The US equity market continued to post record highs, registering its strongest start to the year since 1987 on optimism over the impact of tax cuts on corporate earnings. Expectations that an improving outlook for global economic growth will underpin corporate earnings helped the Japanese equity market to make further progress, although the market gave back some of its

Manager's Investment Report continued

earlier gains as the Yen strengthened against the Dollar. The smaller Asia Pacific markets posted their best start for six years in January, as a combination of improving global economic prospects, US Dollar weakness and a continuing rally in commodity prices underpinned investor sentiment. The best performing markets in the Asia Pacific region last month were Thailand and Malaysia, while the Australian market underperformed as rising bond yields meant utilities and real estate stocks drove the market lower.

The Trust remains well positioned to capture performance of the Technology sector.

Call charges will vary. We may record and monitor calls.

Information on Tracking Error

The 'Tracking Error' of a trust is the measure of the volatility of the differences between the return of the Trust and the return of the benchmark Index. It provides an indication of how closely the Trust is tracking the performance of the benchmark Index after considering things such as Trust charges and taxation.

Using monthly returns, over the review period, the annualised Tracking Error of the Trust is 0.03%, whilst over the last three years to the end of February 2018, the annualised Tracking Error of the Trust is 0.10%. These Tracking Errors are within the anticipated Tracking Error levels set out in the Trust's Prospectus of +/- 0.75% per annum.

Minimum Investment Amounts

The minimum initial lump sum investment amounts for each class are as follows:

R-Class	£500
F-Class	£500
I-Class	£1,000,000

In addition, monthly contributions can be made into the R-Class and F Class with a minimum amount of £50 per month.

F-Class units are only available to:

- i) investors who have received advice from authorised intermediaries and platforms in relation to their investment in units in the Trust and
- ii) authorised intermediaries or distributors who the Manager reasonably considers will adequately bear the costs of marketing to and acquiring investors at no or limited cost to the Manager, and to whom the Manager has confirmed that such distributor or investor meets the criteria for investment in such units.

Other Information

The information in this report is designed to enable unitholders to understand how the Trust has performed during the period under review and how it is invested at the period end. Further information on the activities and performance of the Trust can be obtained by telephoning 0370 050 0955 or by writing to the Manager.
